Helm history and rollback

Helm release statuses

<code>pending-install</code>	The manifests are ready but they weren't sent to Kubernetes yet
<code>deployed</code>	The manifests were sent to Kubernetes and they were accepted
<code>pending-upgrade</code>	The upgrade manifests are ready but weren't sent to Kubernetes yet
<code>superseded</code>	When a release is upgraded successfully
<code>pending-rollback</code>	When roll-back manifests are generated but they weren't sent to Kubernetes yet
<code>uninstalling</code>	When the current (most recent) release is being uninstalled
<code>uninstalled</code>	If history is retained, the status of the last uninstalled release
<code>failed</code>	If Kubernetes rejects the manifests supplied by Helm during any operation
